

**POLON-ALFA**  
**Making fire alarm systems**  
**most reliable**

# POLON-ALFA

» One of the few independent manufacturers of full-range Fire Detection Systems in Europe, as well as one of the biggest producer in the CEE region.

---

» Twelve regional offices in Poland.  
Two foreign subsidiaries based in Bucharest (Romania) and Budapest (Hungary).  
Export to over 30 countries.

---

» Close cooperation with all stakeholders involved in the project at every stage.  
Support in concept development, design process, technical assistance and trainings.

## No1 brand in Poland

with significant market share in domestic market and increasing position internationally.

## Complete solution

POLON-ALFA has wide range of complete FDS designed to protect people and property from the threat of fire.

[ FOR EVERY BUILDING ]

## EN54 certificates

all designed and manufactured products successfully pass the certification process for compliance with European standards.

## Production in Poland

manufacturing is conducted solely in Poland, in the production plant in Bydgoszcz, which specialises in electronic manufacturing of FDS for more than 60 years.

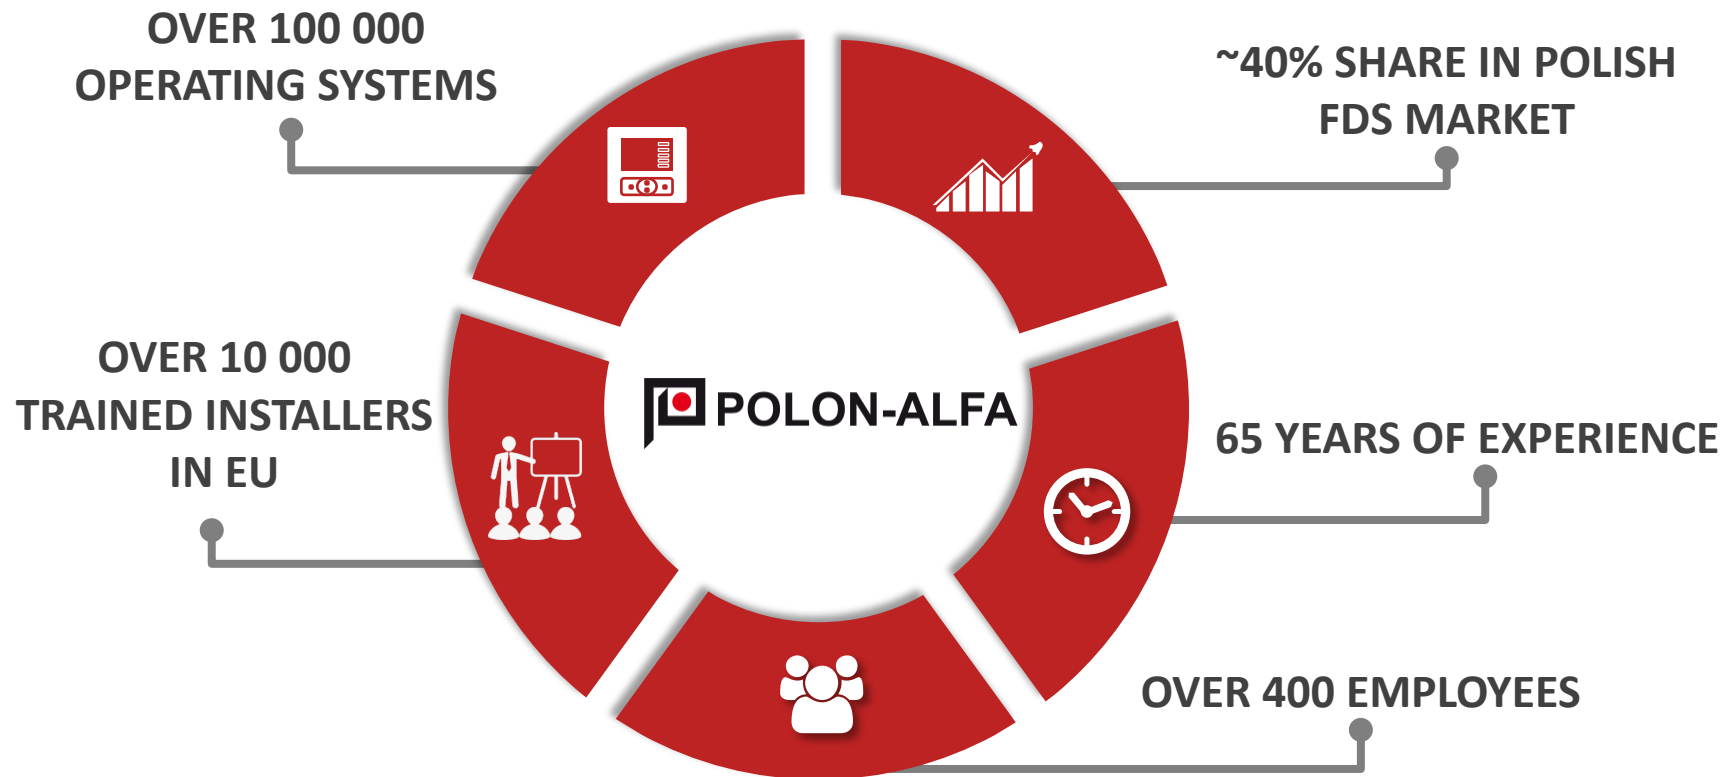

[ COMPLETE SOLUTIONS ]

## Own R&D

Systems offered by POLON- ALFA are 100% in-house designed, on both software and hardware side.

The first in Europe and  
third in the World  
electronic-ionizing  
smoke detector

The first complete fire  
alarm system

## Fire Detectors

### Smoke detectors

**DUO-6046(AD)**  
Dual smoke detector  
(optional sounder)

**DUR-4047**  
Universal wireless  
smoke detector

**DUR-40Ex**  
Optical smoke detector  
- intrinsically safe

### Heat detectors

**TUN-6046**  
*Universal heat detector*

**TUN-38Ex**  
*Universal heat detector -  
intrinsically safe*

### Multi-sensor detectors

**DOT-6046**  
Multi-sensor  
smoke and heat

**DPR-4046**  
Multi-sensor  
smoke and flame

**DOT-6046AD**  
Multi-sensor smoke and  
heat with sounder

**DOT-40**  
Conventional multi-  
sensor smoke and heat

### Flame detectors

**PPW-40REx**  
Multi-band flame  
detector - flameproof

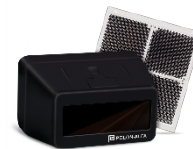

**PUO-40Ex**  
Flame detector (UV) -  
intrinsically safe

**PUO-40**  
Flame detector (UV)

### Beam detector

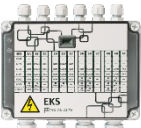

**DOP-6001R**  
Beam smoke detector

### Self-contained detector

**ADR-20N**  
Self-contained home  
optical smoke

## Other Elements

Manual call points	Sounders	Input/output loop device	Panel Modules	Converters	Accessories
 <p><b>ROP-4001MH</b> Addressable fire manual call points - hermetic</p>	 <p><b>SAB-6000/6100</b> Addressable/Conventional acoustic sounder beacon</p>	 <p><b>EKS-6022</b> Addressable, input/output elements</p>	 <p><b>MLD-61</b> Two loops module with converter</p>	 <p><b>CM-182-2</b> Converter with PCM-4000 on BACnet MS/TP</p>	 <p><b>ACR-4001</b> Radio detector adapter</p>
 <p><b>ROP-4007</b> Addressable fire manual call points</p>	 <p><b>SAW-6001/6006</b> Addressable acoustic sounder (optional voice)</p>	 <p><b>EWK-4001</b> Addressable multi-input supervising device</p>	 <p><b>MPW-61</b> High voltage relay's module</p>	 <p><b>CM-180-29</b> Converter with PCM-4000 on ModBus RTU</p>	 <p><b>G-40</b> Base</p>
 <p><b>PO-63</b> Manual call point for smoke ventilation</p>	 <p><b>SAL-4001</b> Addressable signalling device</p>	 <p><b>EWS-4001</b> Addressable multi-output control device</p>	 <p><b>MWS-60</b> Sounders' module</p>		 <p><b>OM-61</b> Casing</p>

**Loop software autoconfiguration**

**Built-in short circuit isolators to every addressable device**

**Addressable beam smoke detector – loop powered**

**Implemented Modbus TCP/IP**

## AVAILABLE VARIANTS

### POLON 3064

Up to 64 addressable devices

### POLON 3128

Up to 128 addressable devices

### POLON 3256

Up to 256 addressable devices

**POLON**  
STUDIO

IS  
**VENO**

- ✓ New line of loop devices
- ✓ USB port for configuration
- ✓ Optional comm module RS 485
- ✓ Ethernet/ModBUS (TCP/RTU)

**The addressable interactive POLON 6000  
Fire Detection System with distributed  
architecture is the most advanced fire  
alarm system offered by POLON-ALFA.**

### OFFICE BUILDINGS

### SHOPPING CENTRES

### RESIDENTIAL BUILDINGS

Scalable design

### INDUSTRY

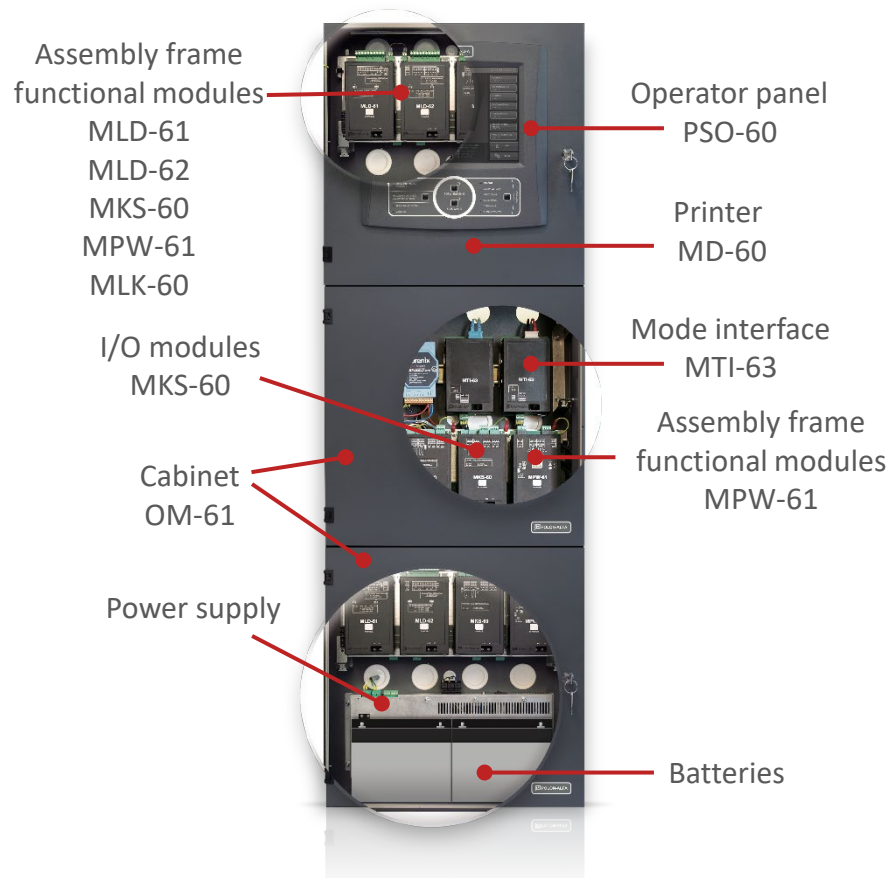

### AIRPORTS

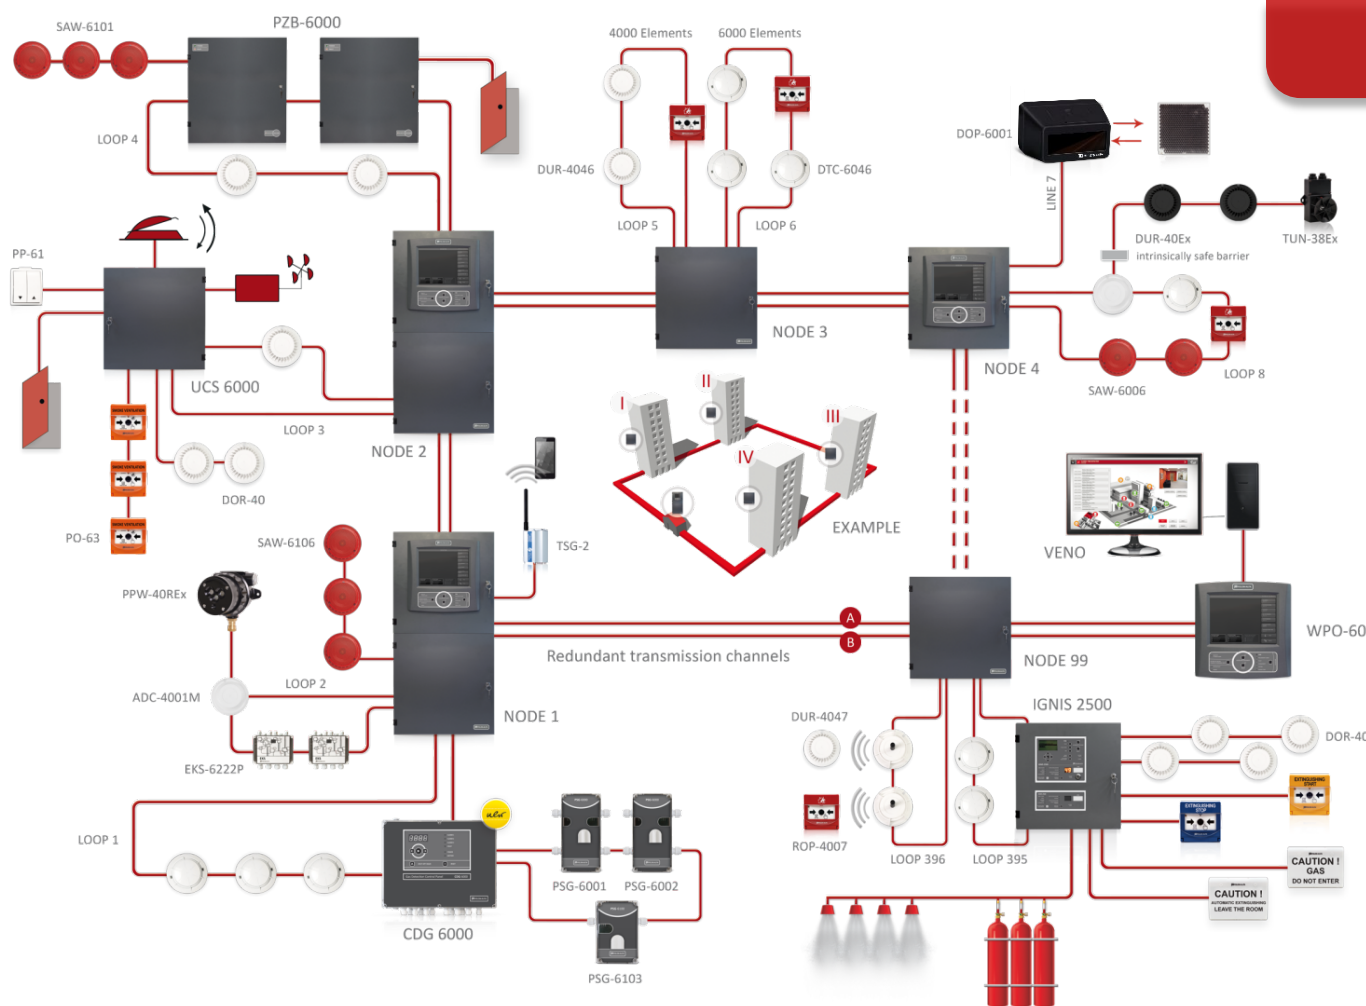

### TRAIN STATIONS

Polon 6000 is based on the idea of a module device with a distributed architecture.

Consists multiple unified modules of various types, installed inside standardized cabinets. Cabinets can be arranged as separate units or combined in sets (so called nodes) and can be located in different places of site area, even if those locations are distant.

All modules within one node and nodes between themselves are connected with doubled (redundant) digital communication bus.

# POLON 6000

Maximum configuration  
of distributed control panel

## 396

Addressable loops

## 1.089

All modules

## 99.000

Addressable elements

## 64.000

SOFTWARE  
FOR DESIGNERS AND  
INSTALLERS

SOFTWARE  
FOR SYSTEM  
ADMINISTRATORS

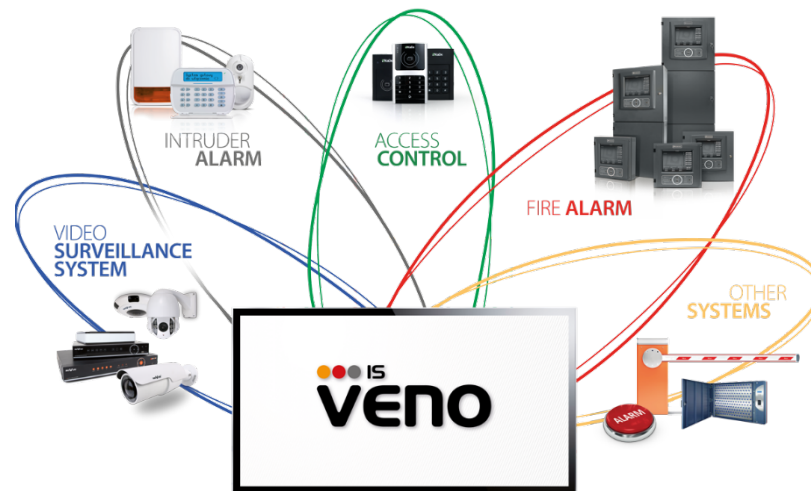

## Easy and user friendly software for planning and configuration of POLON 6000

- » The Company developed own software for designers and installers, which supports the designing and selection of required products.
- » Polon Studio supports users at every stage of the project, from planning, selection of proper devices, to the final configuration of devices.

## VISUALIZATION AND INTEGRATION SOFTWARE FOR SECURITY SYSTEMS

EFFECTIVE SAFETY  
MANAGEMENT IN A FACILITY

ONE COMMON INTERFACE  
FOR ALL SYSTEMS

FACILITY VISUALIZATION

ADVANCED SCENARIOS OF  
SYSTEM REACTIONS TO  
ALARM EVENTS

## One software - different systems

## WE SUPPORT OUR PARTNERS GLOBALLY

### Multi-language systems

- » The system is available in: Polish, English, Russian, German, Hungarian and Romanian languages.
- » The Company is able to provide other language version in quickly.

### Technical support

- » Team of English speaking engineers available for international customers.

### Training for customers

- » Over 100 trainings per annum, e.g. in: Romania, Hungary, Dubai, Saudi Arabia, India, Turkey, Cyprus, Croatia, Portugal, Italy, Slovakia and Poland.

### International presence

- » POLON-ALFA is exhibiting at the fair in Dubai, UK, Romania, Hungary, Italy, Portugal, Turkey, Greece.

## PRODUCTION PROCESS

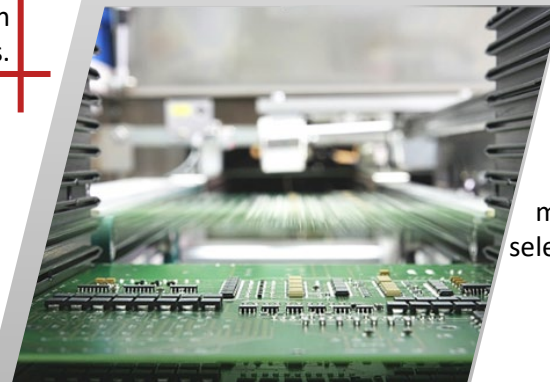

Electronic printed boards are assembled on a high effective automaton.

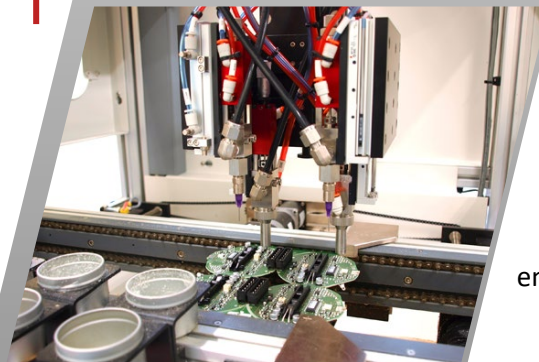

The automatic process of laying of soldering paste using up-to-date automaton.

Ready made electronic printed boards are checked on specialized optical and dynamic testers.

Lead-free soldering is made with ERSA selective soldering system.

Automatic selective coating to increase detectors resistance to high humidity and other environmental influences.

- 
- 
- » 100% products designed by own engineers
  - » Experienced team of almost 50 hardware and software engineers dedicated to R&D
  - » Every year POLON-ALFA release several new products
  - » Modern laboratory provides a wide range of possibilities for testing new devices

- » Modern production facility with an area of over 8.000 sq. m. equipped with innovative machinery park
- » Provides an infrastructure for approx. 4-fold increase in production capacity
